

# REMOTE CONTROL UNIT FOR SIGNAL BOOSTERS

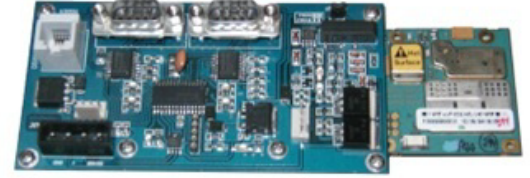

RC-G

## Product Features

Fiplex RC-G unit is an optional module to provide Fiplex signal boosters with remote control and supervision.

RC-G unit works with FOMS (Fiplex Operation and Maintenance System) to provide real time operation over signal boosters parameters. Link is done via Ethernet, Wireless and Cellular Wireless networks.

RC-G unit can be applied to any model of Fiplex signal boosters, from VHF to UMTS.
